

Powerful Monitoring, Insanely Compact.

Cygnets Flyaway Kits are a rapid-deployment, highly scalable solution for securing industrial environments. Powered by Valkyrie, this small form-factor box can plug in and go whether monitoring, responding to an incident, or performing an assessment.

Empower your team for monitoring, threat hunting, and incident response—giving them a powerful tool to capture and analyze OT data in the field.

Instant Visibility

Portable and easy to deploy providing instant visibility to host and network data when you need it.

Remote Monitoring

No internet? No problem. Cygnets collects data and doesn't require a connection for analysis.

Expedite Response

When an incident occurs, Cygnets instantly collects critical data for an accelerated response.

Minimal Footprint

Designed with tight spaces in mind, this powerful kit can fly with you or be tucked away and collecting data.

Specifications

CPU

Intel 19-10900TE (10 Core)
Intel 17-10700TE (8 Core)
Intel i5-10500TE (6 Core)

RAM

32-64GB

Disk

4-12TB solid state

Dimensions

154 x 50.8 x 210mm /
6.06" x 2 x 8.27

Cellular (Optional)

Onboard 4G LTE Cellular Card

Weight

3.8 lb

Ports

2 CBPS LAN ports - one admin/
web access + monitor,
one dedicated monitor

Deploy. Detect. Defend.

Bring your OT cybersecurity tools anywhere. Meet with our team to see Cygnet in action today!
